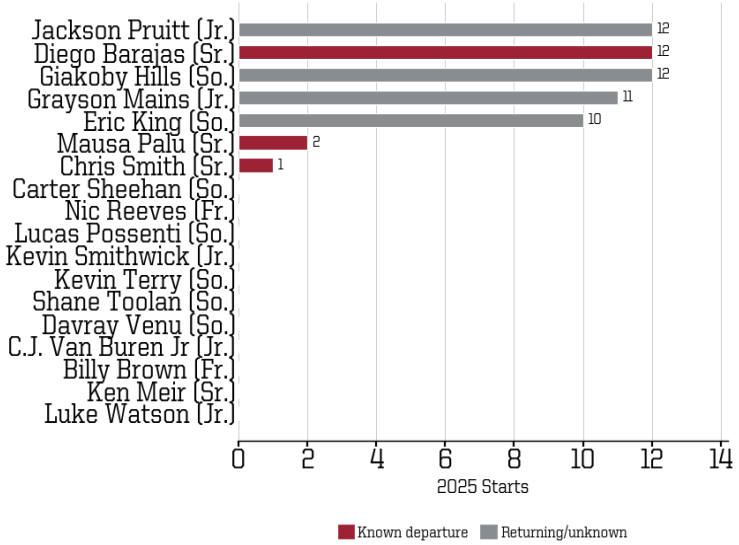
Temple Football Pre-Season Offensive Line Report

2025 Rushing Offense Stats

398	1,773	4.5	20.8%	41.1%
Rush Att	Rush Yds	Rush YPC	Stuff Rate	Rush Success Rate
11th AAC | 108th Natl	*11th AAC | 84th Natl*	*7th AAC | 64th Natl*	*10th AAC | 103rd Natl*	*12th AAC | 98th Natl*

2025 OL Games Started



75%	23.1
Returning Starts	2026 Open Start Index*
1st AAC | 16th Natl	*2nd AAC | 28th Natl*

***Returning starts** = share of last season's starts projected back*

Churn Index = **estimated open starting opportunity, where higher means more likely openings.*

2026 NSD Additions

Karon Spencer (OT) | Fr.
6'5" 310 | Olney, MD | 86 Ovr.

Ransom McDermott (OT) | R-So. (Louisville)
6'8" 305 | Noblesville, Ind. | 86 Ovr.

John Watkins (IOL) | Fr.
6'3.5" 315 | Baltimore, MD | 86 Ovr.

Aiden Zilker (IOL) | Fr.
6'5" 300 | Ashland, PA | 85 Ovr.

John Stone (IOL) | R-Jr. (Rutgers)
6'2" 302 | Sewell, NJ | 85 Ovr.

Logan King (IOL) | Fr.
6'4" 310 | Camden, NJ | 83 Ovr.

Zach Aamland (OT) | R-Jr. (Rutgers)
6'7" 300 | South Brunswick, NJ | 83 Ovr.

Jonah Tarpley (IOL) | Fr.
6'5" 305 | Leonardtown, MD | 82 Ovr.

Quick Hitters (2025 Season Recap)

Identity + Continuity - Temple returns 75% of OL starts (1st AAC) and shifted to a 51% run rate in 2025, its highest since at least 2016 (2024: 44%)
Efficiency Trend Up - Temple improved to a 47% rush success rate, its best since pre-COVID, but still 12th overall in AAC
Power Run Liability - Temple converted just 55.3% power success (14th AAC, last)
Overall Profile - Despite improved YPC (4.45, 7th AAC), Temple ranked bottom-3 in the AAC in line yards, success rate, and total PPA (18.7), with consistency (20.8% stuff rate) and trench play limiting the ceiling

***About Start Projections**

Start projections estimate how much starting opportunity may open up in each position group for the upcoming season. The model looks at recent roster and playing-time patterns, including returning starts, senior usage, transfer departures, roster size, team context, and prior production. Practically, the Open Start Index should be read as a directional opportunity score: higher values suggest more likely openings and roster churn, while lower values suggest more continuity and fewer available starts.
